### **E-SERIES POWERTRAINS**

#### FLEXIBLE FUEL: 4.6L/5.4L GAS V8 FFVs

All E-Series 4.6L and 5.4L gas engines are Flexible Fuel capable. Ford Flex Fuel Vehicles (FFVs) give you the power of choice. E85 or gasoline? FFV lets you decide right at the pump. Both E-Series FFVs can run on E85 (85% ethanol/15% gasoline), straight gasoline, or any combination of the two. Since Ford introduced FFVs back in the mid-1990s, we've put nearly 2 million on the road, with a stream of refinements along the way.

Ford engines are at the heart of E-Series' versatility and capability. Step up to the 5.4L V8 FFV to get extra punch for high-capacity applications. Its SOHC architecture pumps out 255 hp and 350 lb.-ft. of torque across a wide powerband.

#### CNG/LPG FUEL-CAPABLE GAS POWER

Enables 5.4L V8 and 6.8L V10 gas engines to run on Compressed Natural Gas (CNG) or Liquified Petroleum Gas (LPG).<sup>4</sup> Modifications include hardened intake and exhaust valves as well as hardened valve seats.

#### 6.8L GAS V10

For best-in-class gas torque, opt for an available 6.8L V10. Its Electronic Throttle Control (ETC) modulates torque at the drive wheels for smooth, seamless engine response.

#### 6.0L POWER STROKE® V8 TURBO DIESEL<sup>5</sup>

This proven workhorse pumps out 235 hp and generates an impressive 440 lb.-ft. of torque. Cast-iron block and heads withstand the combustion pressures of peak diesel operation. The robust design also features a stiff bedplate, which enhances durability. The Power Stroke is backed by a 5-year/100,000-mile limited warranty.<sup>6</sup>

#### FORD'S MOST RUGGED TRANSMISSION

Proven on F-Series Super Duty® Chassis Cabs and Pickups, the available TorqShift® 5-speed automatic transmission is designed for the high torque outputs of powerful E-Series engines. An innovative Tow/Haul Mode<sup>7</sup> reduces gear hunting when towing and uses engine braking when descending steep grades.
